

This diagram shows the device 1 in an exploded perspective view. It consists of a main rectangular body 12, a lid 13, and a rectangular plate 11. The lid 13 is shown hinged to the top of the body 12. The plate 11 is shown positioned inside the body 12, with a small rectangular block 14 resting on its top surface. The body 12 has a recessed area on its top surface where the plate 11 is located. The lid 13 has a curved top edge and a hinge mechanism connecting it to the body 12. The plate 11 has a central rectangular opening. The block 14 is a small rectangular piece that fits into the opening of the plate 11.
